

# Organic Lawn Program

Start this program if you:

- \* completed the Beginners Organic Lawn Program
- \* Practiced Organic lawn care for at least one year

<b>February</b>	Apply Corn Gluten Meal as a pre-emergent herbicide
<b>February/March</b>	Compost top dress with Nature's Way Resources Leaf Mold and/or Fertilize with MicroLife 6-2-4 (Green Bag)
<b>March/Early April</b>	Apply Azomite a trace mineral supplement. This helps the fertilizers do their job. MicroLife Humates plus (purple bag)
<b>April/Early May</b>	Add another round of compost and/or MicroLife 6-2-4
<b>May to June</b>	Apply Corn Gluten Meal as a pre-emergent herbicide
<b>June to July</b>	Add another round of compost and/or MicroLife 6-2-4
<b>August to September</b>	Compost Top dress with Nature's Way Resources Leaf Mold compost. Be on the look out for Brown Patch use MicroLife Brown Patch to treat if it comes up. Spray Ocean Harvest on healthy grass surrounding the brown patch to encourage that grass to spread into the effected area.
<b>November</b>	Winterize your lawn with another top dressing of Nature's Way Resources Leaf Mold compost.
